

## **SENIOR TECHNICIAN FOR THE FOR THE FRAUNHOFER CENTER OF APPLIED TERAGNOSTICS (ST01-FCAT)**

### **1. Introduction to the position:**

The Fraunhofer Spain Research foundation is looking for a SENIOR TECHNICIAN to bring support and coordinate technical aspects on different projects at the Fraunhofer Center of Applied Theragnostics in Catalonia (Fraunhofer-CAT).

The contract will be within the framework of the Fraunhofer-CAT project, whose objective is the development of new diagnostic, prognostic and therapeutic tools in the field of precision medicine. For example, the development of new technologies for i) the establishment of biomimetic organ and tissue models for in vitro testing, ii) the development of sensors and electronic devices, iii) the design and validation of therapeutic strategies for personalized medicine, and iv) the production and validation of new biological models.

This project is funded by: Ministerio de Ciencia, Innovación y Univeridades, Generalitat de Catalunya and Ajuntament de Barcelona.

### **2. Main duties and responsibilities:**

Under the supervision of the Fraunhofer-CAT direction, the applicant will carry out the following activities:

- Support to research in microfluidics and organ-on-chip devices, including conducting experiments and analysis according to project workplan and publish and participate in publications.
- Management of specialized laboratory equipment, including training of new users, writing standard operation protocols, installation, repairing, calibration, location and records of the use.
- Ensure compliance with good laboratory practices in coordination with safety officers.
- Purchase management of specialized equipment, including collecting needs of laboratory members, documentation, relationships with suppliers and follow up until the reception and installation of the equipment.
- Collaboration in knowledge retention, including reading and reviewing of specific material, learning from other positions and participating trainings.

### **3. Requirements for candidates**

#### Essential

- PhD in Materials Science
- Experience in a similar position (minimum 6 years)
- Excellent organizational skills for experimental planning, delivery preparation and reporting.
- Ability to prioritize tasks, multitask, and manage time effectively.
- Knowledge of biosafety and chemical safety protocols.

Financiado por:

- Extensive knowledge in design, fabrication and testing of microfluidic devices and organ-on-chip devices.
- Competencies and skills: Communication, Teamwork and collaboration, Commitment, Proactivity, Integrity, Critical and Analytical thinking
- Good level of English

#### Advantageous:

- Prior experience in cell culture and microscopy.

#### **We Offer:**

- Number of available positions: 1
- Starting date: as soon as possible
- Working conditions:
  - Full time permanent contract. Attractive salary
  - Measures to reconcile work and family life (maternity and paternity leave, flexible schedule working hours, teleworking, 23 working days of paid holidays, 9 leave days for personal matters, among others).
- Fraunhofer Spain Research ensures equality of access to professional development opportunities irrespective of employment status or other factors.
- Stimulating, interdisciplinary research and high-quality international scientific environment.
- Induction programme to facilitate incorporation at Fraunhofer Spain Research and additional support is provided for foreigners to obtain Visa-working permit and to install in Barcelona.

---

#### **How to apply:**

**Until the 1<sup>st</sup> of December**, by sending a CV and motivation letter to [info@fraunhofer.es](mailto:info@fraunhofer.es) with the reference "ST01-FCAT" as subject of the email.

Only those applications submitted before the deadline will be evaluated.

#### **Reference: ST01-FCAT**

If you have any further questions regarding your application or the application process, please get in touch with us at [info@fraunhofer.es](mailto:info@fraunhofer.es)

#### **Principles of the selection process:**

Fraunhofer Research Spain Foundation is committed to the principles of the Code of Conduct for the Recruitment of Researchers of the European Commission and the Open, Transparent and Merit based Recruitment principles (OTM-R).

Fraunhofer Research Spain Foundation's commitment on equal opportunity: our strength and excellence as an international transdisciplinary research institute are based on diversity. Being an equal opportunity

Financiado por:

employer, we are committed to diversity and inclusion, so that we support employees irrespective of their gender, nationality, religion, disabilities, age, sexual identity or cultural and socioeconomic background.”

Fraunhofer Research Spain Foundation aims for a representative gender balance at all levels of staff, so we strongly encourage women to apply. At least 40% of shortlisted applicants invited to interview have to be women with comparable level of CVs as the male candidates.

### **Protection of personal data:**

Fraunhofer Spain Research Foundation guarantees that candidates’ personal data are processed in accordance with the requirements of the EU General Data Protection Regulation (GDPR) and Law 3/2018 on Data Protection.

Personal data will be processed solely for the purposes of the selection process.

### **Who we are?**

The Fundación Fraunhofer Spain Research (Fraunhofer Spain) is a non-profit private Spanish Foundation, established in Barcelona in 2025 as an affiliate of Fraunhofer-Gesellschaft, Europe’s leading organization for applied research (<https://www.fraunhofer.es/>).

Our mission is to conduct independent research activities, including training, knowledge dissemination, and technology transfer. These activities range from basic research to prototype development and small-scale production, strengthening the internationalization of applied research and connecting academia with productive sectors.

Fraunhofer Spain Research has launched its first program in applied bioengineering for health: the Fraunhofer Center of Applied Theragnostics (Fraunhofer CAT). This initiative is dedicated to developing innovative diagnostic, prognostic, and therapeutic tools within the field of precision medicine. The program aims to generate significant academic, industrial, and healthcare impact, ultimately contributing to societal well-being.

Fraunhofer Spain was founded by Fraunhofer-Gesellschaft, the largest organisation for applied research in Europe with the economic support of the Spanish Government (Ministerio de Ciencia, Innovación y Universidades), the Barcelona City Council (Ajuntament de Barcelona), and the Catalan Government (Generalitat de Catalunya), as well as the academic collaboration of Barcelona University, the Institute for Bioengineering of Catalonia (IBEC) and Fraunhofer Institute for Biomedical Engineering (Fraunhofer IBMT).
